

YARMOUTH HOSPITAL FOUNDATION

to your health

**CUTTING EDGE TECHNOLOGY
THE FOCUS OF
2024 SPRING APPEAL!**

In Canada, approximately 28,600 women are diagnosed with breast cancer yearly, so we want patients at our regional hospital to have every advantage they possibly can when fighting this disease.

A breakthrough in medical technology, **MOLLI®** allows surgeons to remove lesions in the breast with increased efficiency and accuracy. As radiologist Dr. Beth Furey tells us, "The **MOLLI Marker®** allows radiologists to precisely localize breast cancers for removal without using cumbersome wires, improving patient comfort before and during surgery."

MOLLI® technology works by marking the location of a tumour with a tiny tissue marker (only about the size of a sesame seed). Using this method, the surgeon can more accurately visualize its location with a simple distance reading on a tablet. The marker is implanted by a radiologist within 30 days prior to the surgery, resulting in greater scheduling flexibility for the patient and hospital.

"Breast cancer diagnosis and surgery can be a very stressful time for patients," Dr. Furey continues. "The **MOLLI®** system will enable our health care team to enhance the overall patient experience with state-of-the-art care."

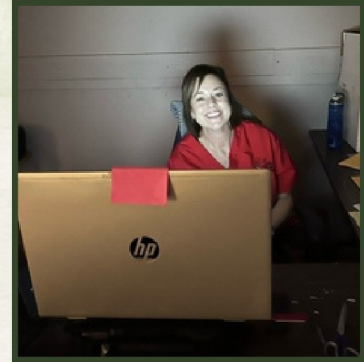

A MOLLI MARKER®

**(((A RADIOTHON))))
TO REMEMBER**

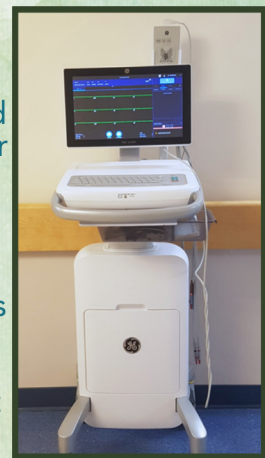

The 2024 Radiothon may have been an eventful one, with power outages and downed phone lines making things interesting for us over at Radiothon HQ, but **our region still set a shining example for what a caring community can do!**

HARD AT WORK
IN THE DARK

With more than **\$122,000** raised, we are now able to improve the level of cardiac health care offered here at Yarmouth Regional Hospital, serving the communities of Yarmouth, Digby, and Shelburne. Because of our incredible donors, **fifteen cardiac watches, a patient data management platform, and two ECG units** have been ordered!

The cardiac watches provide a virtual cardiac rehab option, allowing for the remote monitoring and early detection of irregular heart conditions. The new ECG units will replace older machines that were nearing the end of their life, and will allow patients to benefit from prompt diagnosis and treatment plans. This new equipment will be key in our fight against cardiovascular disease.

A NEW ECG UNIT

All this and more is due to the generosity of our sponsors and donors! Thanks to each and every one!

THE HEALTHCARE FOUNDATIONS NS 50/50

Making a donation AND getting a chance to win big? Sounds perfect to me!

The Nova Scotia Healthcare 50/50 is a monthly online raffle fundraiser supporting health care foundations across the province!

50% of the ticket sales will be awarded to the Nova Scotian who purchased the winning ticket number, and the remaining 50% (minus expenses) will be evenly distributed among the 24 health care foundations in Nova Scotia who are participating in the initiative.

What's more, you can name which hospital foundation inspired you to enter, and they will receive extra money on top of their guaranteed share!

To purchase tickets and support Yarmouth Hospital Foundation, or to learn more, visit:
