

Welcome to your Summer Summary! ☀️

Wed 8/24/2022 12:48 PM

Welcome to our Summer Summary, where we catch you up on all the latest from your regional hospital and your hospital foundation. Hopefully this newsletter finds you enjoying the sunshine and staying hydrated and heat-safe!

Four New Nursing Scholarships Announced

NURSING SCHOLARSHIPS

Yarmouth Hospital Foundation is administering nine scholarships this year for the incoming BScN class at Dalhousie School of Nursing, Yarmouth Campus

The graphic features the Yarmouth Hospital Foundation logo at the top left. To its right, the words 'NURSING SCHOLARSHIPS' are written in a large, white, serif font. Below this, there are three circular inset photos of nursing students: a young woman with dark hair smiling, a young woman with long dark hair looking at a book, and a young man and woman smiling together. At the bottom, a white text box contains the information about the scholarships.

Yarmouth Hospital Foundation has created four new scholarships for students entering the Dalhousie University Bachelor of Science Nursing (BScN) program (Yarmouth Campus) beginning this fall, bringing our total to nine. With approximately 36 students beginning their training this year, this means that the foundation will award scholarships to approximately 25 percent of this year's class.

Three of the new scholarships are for \$3000 each; these were created thanks to a generous endowment from an anonymous donor and will be available for any qualified applicants. The fourth is an Equity, Diversity and Inclusivity scholarship named for local heroine Sara Corning and is designed to encourage minority students to apply to study nursing.

Thank you so much for your generosity in our Spring Appeal!

After totalling up all the very generous donations received for our Spring Appeal (to raise money towards the purchase of two multiparameter patient monitors for your Emergency Department), we are delighted to announce that one of the monitors is fully funded! Thank you so much, Tri-Counties!

These state-of-the-art monitors assist with diagnosing conditions such as hypertension, Type 2 Diabetes and cardiovascular disease, as well as helping identify risks such as heart attack or stroke. Each unit costs \$37,500, so we're halfway to our goal of funding these units by the end of the summer. If you've not had the chance to donate yet, head to [our website](#) for details as to how!
